1 Figures based on total provincial allocations and total number of child care spaces.

2 2001 and 2004 figures for PEI do not include part-day kindergarten expenditure or spaces for the purpose of comparison with other jurisdictions. Therefore, PEI's 2001 and 2004 figures are not comparable to its earlier figures.

3 Quebec figures include expenditure on school-age care from the Ministry of Education.

4 School-age child care in Alberta became regulated for the first time in 2004. For purposes of comparison with previous years, the 2003/04 figure for Alberta is calculated using the number of spaces without school-age care; the figure including school-age care appears in brackets. However, the figure including school-age spaces has been used in the totals in this table.

5 British Columbia's figures use an estimate for provincial allocation because British Columbia allows subsidies to be used in unregulated care. These figures have been adjusted accordingly.
