1 Note that in 2005/2006 many provinces/territories did not include federal ECEC transfer in their provincial allocation. Nor was it possible to systematically identify how and when those funds were spent. Consequently, this table represents the identified allocations.

2 Figures based on total provincial allocations and total number of child care spaces.

3 2001, 2004 and 2006 figures for PEI do not include part-day kindergarten expenditure or spaces for the purpose of comparison with other jurisdictions. Therefore, PEI's 2001 and 2004 figures are not comparable to its earlier figures.

4 Quebec figures include expenditure on school-age care from the Ministry of Education.

5 British Columbia's figures use an estimate for provincial allocation because British Columbia allows subsidies to be used in unregulated care. These figures have been adjusted accordingly.
